Subject: Pelican Point M/049/011

Received a call from Justin Cozad (Pelican Point) informing us that John Sather no longer worked at the site. I had called Justin several times in the last week to inquire as to the status of the aerial that was to be flown over the site earlier this year. Justin seemed to be unaware as to what was required for the updating of the permit.

I told him that he should contact Patrick Collins of Mt. Nebo Scientific to authorize Patrick to complete the work that he had started.

Last week I had spoken to Patrick and he told me that the aerial has not been flown yet, which is the main item I need to update the bond. Patrick is also working on expansion of the present permit to include additional SITLA land, which was recently put under lease.

Our information request is way overdue and if I don't see any action within the next few weeks, we may have to contemplate a NON for this permit.

Justin is to notify us by mail of what they are planning within the next few weeks. I will wait to see what they propose before initiating any actions.

Joelle please send this note to the file
